

Kaizen/Lean Foundation – Workshop on 26th & 27th March 2018 @CGTI, Phnom Penh, Cambodia

Kaizen Institute presents an opportunity for senior leaders and decision makers to understand how successful organizations attain operational excellence through Lean Methodology & Kaizen thinking!

This is indeed a big question on every leader's mind!

Lean cannot be understood or implemented as a *“project” or “set of tools”*, where few people are involved in driving a few activities – be it Five S, or some bits of TPM or some Process Improvements and Mapping!

Lean Methodology is a state where:

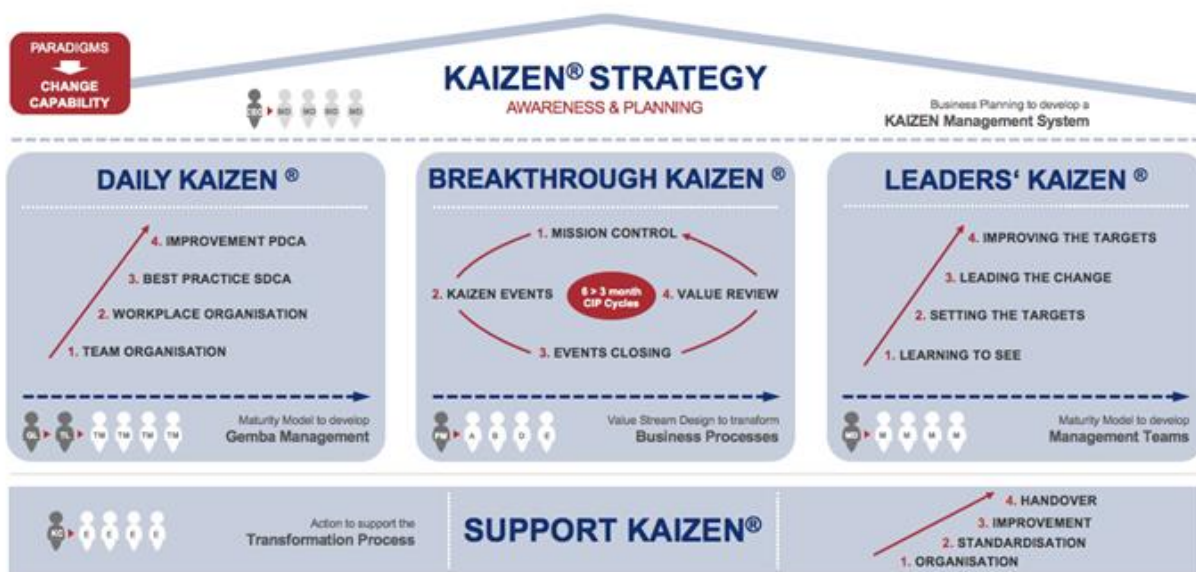

- Everyone, every day and everywhere in the organization understands, applies and promotes Lean. It is ingrained in people's DNA!
- It is a situation where from the Chairman to the Doorman, almost everyone has an opportunity to find and fix problems!
- The organization believes in learning on a daily basis and doing **Kaizen** on a daily basis

Learnings from the workshop

This two day workshop on Kaizen/Lean Foundation is aimed at sharing what successful organizations do to build and sustain Lean culture!

Interact and learn from the some of the senior-most Kaizen Institute consultants who support several organizations in building Lean Methodology, understand the building blocks of Lean via the **Kaizen Change Model**:
